

# Regulatory has one home

## AI-Native Workbench

**Regulatory documents** are the foundation of your therapeutic candidate's success, requiring **scientific precision, strategic expertise, and meticulous execution**. Now preparing regulatory content is faster and more efficient than ever.

The Weave solution includes:

- **The Base Platform:** Weave's robust data room, support for simple document generation, and storage for content related to ongoing and completed programs.
- **AutoIND:** The flagship product to accelerate IND preparation, delivering ~70% reduction in drafting time, returned capacity to teams, and lower operational costs.
- **AutoCT:** Our product for creation, refinement, and review of clinical phase documents (CSRs, clinical protocols, amendments) that ensures speed and accuracy at every step.

Go from **six months to six clicks** with the only comprehensive, AI-powered **regulatory automation management platform** from Weave.

Plan and organize, then draft with one click

**UPLOAD** Import source files and summarize instantly

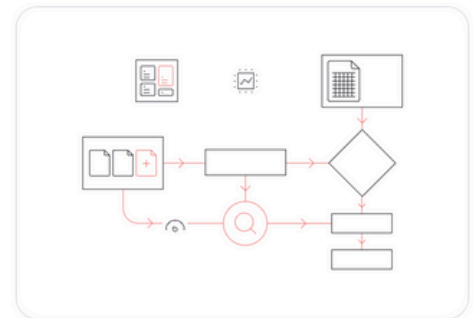

**DRAFT** Utilize in-platform templates and push button first drafts

Plan and organize, then draft with one click

**REFINE** Optimize content swiftly by instructing the AI

**REVIEW** Collaborate seamlessly on reviews and add in our AI reviewer

Validate data accuracy to reinforce confidence

**VERIFY** Confirm accuracy with two-click tracing from content to sources

**PUBLISH** Publish from a single platform when content is ready
