HAQ Manager

How regulatory teams respond with speed and confidence

THE CRITICAL PHASE WHERE EVERY HOUR COUNTS

Health Authority Questions (HAQs) are among the most time-sensitive and unpredictable phases of drug development. Dozens—or even hundreds—can arrive at once, each requiring precise, traceable responses on compressed timelines.

HAQ MANAGER CAPABILITIES

- AI extraction and categorization of HAQs from .pdf and .docx

- Automated metadata tagging and question traceability

- SME assignment and collaboration in a shared workspace

- First-draft response generation (narrative or tabular)

- Sentence-level source tracing and export to Word (.docx)

BENEFITS FOR REGULATORY TEAMS

- Respond to HAQs faster without sacrificing quality

- Reduce manual effort and version confusion

- Maintain confidence during health authority review

**BUILT WITH TOP-20 PHARMA**

TESTED ON FDA & EMA QUESTION SETS

96% PRECISION 97% RECALL
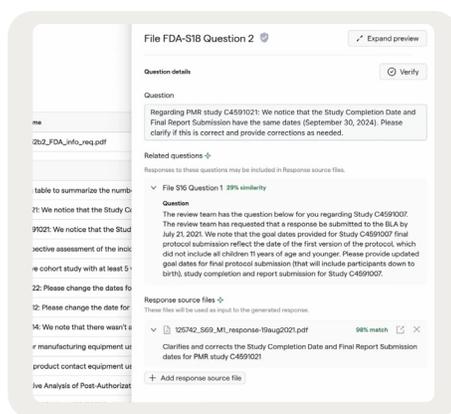

01

Respond faster

Import health authority question files (.pdf or .docx). Weave AI automatically separates individual questions and categorizes metadata with high accuracy—turning what used to take hours into minutes.

02

Collaborate across functions

Compare extracted questions with the original file. HAQ Manager identifies relevant source documents in your Data Room and allows teams to assign questions to SMEs for drafting and review, all within one shared workspace.

03

Link with confidence

Generate first-draft responses—narrative, tabular, or structured—directly in section 1.11. Refine, validate, and export final responses to .docx, with full traceability back to every verified source.

Think faster. Respond smarter.
