- Data verification mode with sentence-level tracking
- In-platform review and commenting
- AutoReview of content (beta)

● Organization management

- Child organizations
- User roles and permissions
- Configurable dossier visibility

Weave Bio

Infrastructure & data security

- Weave's platform is hosted on AWS and uses commercial providers for LLMs, namely OpenAI.

- Weave has Zero Data Retention agreements in place with all LLM providers that may contact customer data.

- Weave does not permit machine learning/training on any customer data, nor does it permit its vendors to.

- Weave follows industry-best security and privacy practices. Details are available upon request and Weave is happy to complete customer IT questionnaires and vendor approval processes.

- Role-based permissions and access control are available upon the Weave platform.

Implementation & support

- Weave provides a thorough, hands-on onboarding process inclusive of user training and customization of AI templates to suit customers' unique organizational needs.

- Training can take up 2 weeks, depending on user availability. Template customization typically takes 1-3 weeks. Combined this leads to an average overall onboarding and implementation time of approximately 4 weeks.

- Ongoing customer support is available via email with guaranteed response times.

- Additional support for template customization beyond that included in the initial onboarding package is available as a service for purchase.

Regulatory has one home.

In today's fast-paced environment, staying ahead requires speed, precision, and adaptability throughout the regulatory lifecycle. Weave sets a new standard with a software platform that has AI-infused throughout the workflow to simplify complex processes from data organization to submission and beyond.

Our platform provides a single source of truth for the life of your therapeutic candidate, enabling teams to seamlessly collaborate, accelerate project timelines, and deliver high quality, submission-ready content for each required document or report.
