Weave Bio

Company background & expertise

Weave was started in 2022 and has since developed the only AI-native platform that supports the entire regulatory lifecycle. Customers span all segments of the ecosystem - from start ups and small biotechs to large pharmaceutical companies and global CROs. References are available upon request.

  - In-platform review and commenting
  - AutoReview of content (beta)

- **Organization management**
  - Parent and child organizations
  - Controlled user roles and permissions
  - Configurable dossier visibility

Weave Bio

Infrastructure & data security

- Weave's platform is hosted on AWS and uses commercial providers for LLMs, namely OpenAI.
- Weave has Zero Data Retention agreements in place with all LLM providers that may contact customer data.
- Weave does not permit machine learning/training on any customer data, nor does it permit its vendors to.
- Weave follows industry-best security and privacy practices. Details are available upon request and Weave is happy to complete customer IT questionnaires and vendor approval processes.
- Role-based permissions and access control are available in the Weave platform.

Implementation & support

- Weave Onboarding can be up to 4 weeks, to ensure all users are trained and proficient within the Platform. Users can then independently upload files, generate content, and customize AI templates to suit unique organizational needs.
- Training is delivered during hands-on sessions over 2 weeks depending on user availability.
- Customer Success maintains regular engagement after onboarding so key milestones are met and all questions are addressed promptly.
- Ongoing customer support is available via email with guaranteed response times.
- Additional support for template customization beyond initial onboarding is available.

Regulatory has one home.

In today's fast-paced environment, staying ahead requires speed, precision, and adaptability throughout the regulatory lifecycle. Weave sets a new standard with a software platform that has AI-infused throughout the workflow to simplify complex processes from data organization to content creation, submission, and beyond.

The Weave Platform provides a single source of truth for the life of your therapeutic candidate, enabling teams to seamlessly collaborate, accelerate project timelines, and deliver high quality, submission-ready content for each required document or report.
